"Understanding and responding innovatively to customer requirements
– that is the focus of everything we believe and do.
We work together as a team in pursuit of a specific goal:
the perfect symbiosis of form and function.
It is the only way to produce exceptional results that make our lives
better and more comfortable at the same time."

ABBREVIATIONS

VARIANTS:

(ML) mortice lock
(PC) profile cylinder
(BR) blind rose
(FP) fire protection
(KH) knob-handle rose set
(KHL) knob-handle rose set left
(KHR) knob-handle rose set right
(WKR) without key rose
(SHL) single handle left
(SHR) single handle right
(SHG) single handle grub screw on end face
(HP) handle pair
(LH/LH) lever handle/lever handle
(CC) cylinder cover
(SB) strike box
(NL) not lockable

(PU) packaging unit

FINISHES:

(BR) brass
(NS) nickel satin
(GS) gold satin
(SW) silk white
(VG) velvet grey (next approximate value RAL 7048)
(CGR) cashmere grey (next approximate value RAL 7022)
(CHR) chrome
(SSS) stainless steel satin
(SSB) stainless steel brushed
(GB) graphite black (next approximate value RAL 9011)
(SSSE) stainless steel satin effect

NOTES ON THE FINISH:
Slight colour deviations due to production technology are unavoidable, especially across different delivery batches.

PLEASE NOTE THE NEW PU QUANTITIES

ITEM NUMBERS

189 | 16 | 01 | 71

Item no. | Design | Version | Finish

AS AN EXAMPLE:
Door handle LUCIA (189) designed as a clip-on rose set (16) in version ML (01) with stainless steel finish (71)

Each of our products has an item number with an “expressive” structure. The first three digits represent the item, e.g. the handle LUCIA. The next two digits are used to define the handle LUCIA in more detail. This shows that the handle LUCIA has a clip-on rose design. The key rose that forms the next two digits as the version is still missing. The last two digits are also very important – as they determine the finish or material of the item.

CONTACT

You can reach us on the following phone number:

+49 (0)731 93 80 89 – 20

To enable quicker processing of your requests, we have set up three email addresses for you.

Please send your orders directly to:

international.orders@griffwerk.com

Please send quotation requests, technical questions, delivery status requests and general inquiries to:
international.sales@griffwerk.com

Please send any complaints directly to:

beanstandungen@griffwerk.de

OUR DELIVERY CONDITIONS

– Free standard delivery on orders of hardware over €250.00, otherwise the shipping costs are €9.50 per order
– Free standard delivery on orders of glass items over €699.00, otherwise the shipping costs are €49.00 per order
– Additional shipping costs of €55.00 are charged for orders with excess lengths over 2400 mm
– Express delivery; next working day delivery on orders of hardware €25.00
– Express delivery; next working day delivery on orders of glass items €89.00
– These regulations apply to customers and deliveries within the Federal Republic of Germany (excluding islands)
– Please refer to the respective order confirmation for delivery times
– It is possible to receive weekly or fortnightly deliveries within a fixed tour.
  Please discuss the shipping conditions with your respective outside sales contact.

IMPORTANT:
This price list is valid from 1 January 2026 and supersedes all previous price lists.
Subject to price variations, technical changes, misprints and layout alterations.

CLASSIFICATIONS/APPROVALS

Go to our homepage at WWW.GRIFFWERK.DE.

RETURNS

– For returned items with a total value of up to€125.00, we charge a €25.00 restocking fee to cover the costs of returns.
  If the total value is over €125.00, an amount equal to 20% of the purchase price shall be deducted.
– Items must be returned within 20 working days after receipt of the return order. There shall be no entitlement to a credit note for items returned later than 20 working days.
– Items returned without prior notification/GRIFFWERK return order shall not be processed.
– Specially manufactured items are excluded from the returns policy.

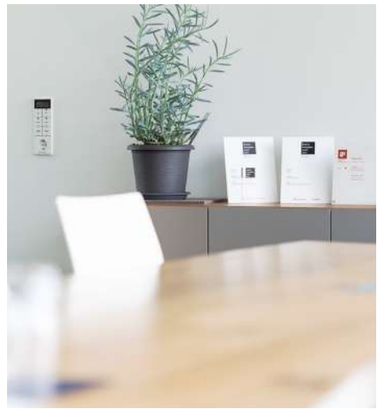

COMPLAINTS

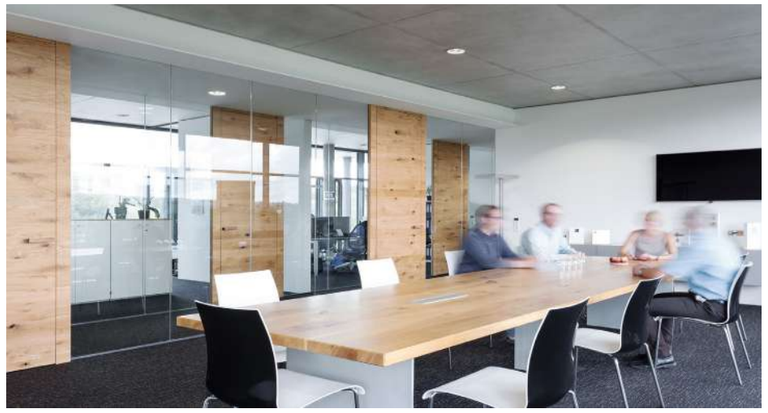

Complaints must be submitted using the complaint form and providing photographic evidence.

WELCOME TO BLAUSTEIN

Door hardware and glass door systems are our passion. Through our exceptional design expertise, we create functional architectural elements that transform and open up spaces. Their silent operation is proof of thoughtfully engineered technology. Carefully selected finishes, shapes and details provide a tactile experience that delights the senses. GRIFFWERK, based in Blaustein near Ulm in Southern Germany, was founded in 1999.

LOGISTICS: TOP EQUIPMENT

Cutting-edge logistics: Picking workflows are supported by automation systems.
The automatic horizontal storage system stores and sorts items fully automatically using individualised vacuum lifters, while long items are stored in the automatic vertical carousel and autostore takes care of small parts.
As a result, workers can focus their attention on more complex and demanding tasks: From inbound containers and returns processing to national and international outbound shipments, more than 80,000 packages are managed across CEP services, door-to-door shipping and freight forwarding.

VAYA – THE NEW DOOR HANDLE GENERATION

Our new door handle generation is a reflection of our constant pursuit to improve and excel.
Innovative technology meets exceptional design and high-quality finishes –
aesthetically appealing, highly functional and perfect for every space and taste.

The brand-new maintenance-free fast2fix quick-mounting technique, featuring hold-up springs on both sides of the handle, is perfectly complemented by the smart2lock locking mechanism with a new 3-point lock, together providing a consistently secure grip and even more enjoyable operation.

At just 6 mm thick, the rose stands out due to its fine disc grinding and flawlessly ground edge.
Combined with a variety of handle shapes, colours and a distinctive finish, it creates a perfectly harmonious look.

Matching door hinges and locks enhance the overall aesthetic appeal, ensuring absolute perfection for every door and room.

smart2lock
by GRIFFWERK

High-quality finish
– Fine disk grinding
– Flawlessly ground edge

Innovative technology

fast2fix
by GRIFFWERK

Flat rose
– Just 6 mm thick
– Round or square

Premium finishes and design
– Particularly pleasant to touch
– Robust and durable
– Design lines for various décor styles
– Perfectly complemented by hinges and locks that match the shape, colour and handle

FAST2FIX ROBUST, QUICK AND COMFORTABLE

ADVANTAGES OF FAST2FIX
– Quick and easy assembly
– Robust metal substructure
– Hold-up springs on both sides of the handle (compression spring technology)
– Access for assembly and disassembly is provided from the underside, and thus out of sight
– Maintenance-free plain bearings for long, smooth and silent operation
– Also for smart2lock technique
– Suitable for 38 – 50 mm thick doors, adjustment of Up to 80 mm can be achieved with the extension set when using an interchangeable pin
– Category of use 3 to DIN EN 1906
– Compensating sleeve for Austrian standard included

SMART2LOCK

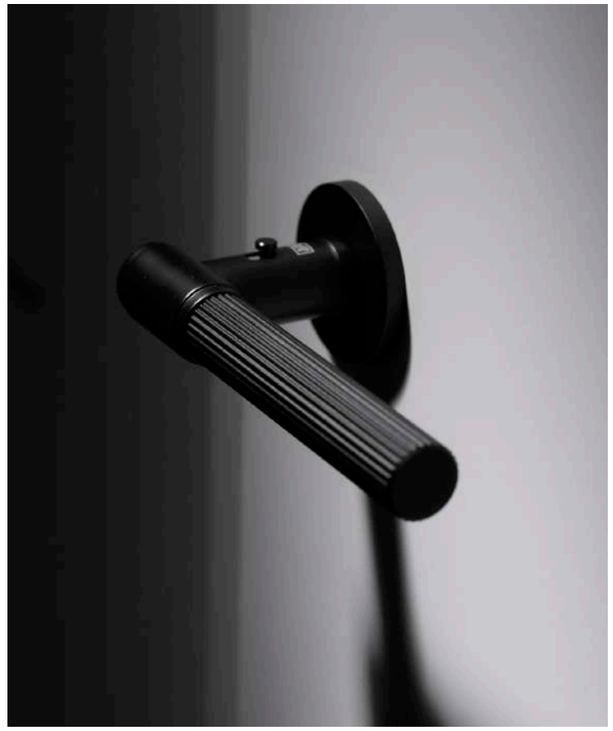

THE MOST BEAUTIFUL WAY TO SAY “DO NOT DISTURB”

GO TO VIDEO

Whether unwinding in the bathroom, power napping in the bedroom, working in the home office or hanging out in a teen’s room: smart2lock by GRIFFWERK lets you enjoy more time for yourself.
One click is all it takes to activate the integrated locking mechanism in the handle, thus turning every room into a secure and private retreat.
A discrete red dot on the outside lets everyone know it is time for a break – the most beautiful way to say “do not disturb”.

Thanks to the integrated locking mechanism in the handle, you can say goodbye to key roses.

A discrete red dot on the outside of the door handle lets everyone know it is time for a break.

Now even more robust due to the **NEW 3-POINT LOCK**.

AWARD-WINNING INNOVATION

GRIFFWERK won gold at the Heinze “Architects’ Darling Awards 2022” for its innovative locking mechanism “smart2lock by GRIFFWERK” in the “Best Product Innovation (Shell/ Expansion)” category.

ONE DETAIL MAKES ALL THE DIFFERENCE

ARIS

The lamellar structure is inspired by nature. Throughout cultural history, it has often been reinterpreted in modern industrial design as a composition of clear geometric shapes. The result is a finish that unites lightness, stability and precision in perfect harmony. Functionality defines the aesthetic experience, while the tactile elements makes operation intuitive. Carefully crafted curves and recesses create a refined interplay of light and shadow.

The essence of the Aris handle series is the perfect balance between form and function.
A design that defines the style of the door, seamlessly linking interior and rooms through the ideal unity of the handle, hinge and lock. The Aris series sets new benchmarks by seamlessly blending technical precision, functionality and architectural elegance.

Be it door handles, furniture handles in varying lengths, door knobs, hinges for steel or wooden frames or window handles: The ARIS series delivers cohesive, stylish solutions for a seamlessly designed interior.

ARIS
Window handles

THE MASTERPIECE

VAYA 128 LUCIA

LUCIA: Purity of design meets perfection! Two sleek round tubes connected at a precise 90 degrees highlight the minimalist aesthetic, while the larger 21 mm handle diameter (instead of 18 mm) provides a noticeably superior touch. The top of the grip offers a wider surface for your hand and makes holding the handle feel effortlessly comfortable.

Moreover, the fast2fix quick-mounting technique enables fast and easy attachment.
The minimalist design is preserved with no visible screws to distract from the overall look.
Handles are securely fixed and can be easily installed.

And frankly the best design is unobtrusive, timeless and reliable.

NEW:
VAYA 128 LUCIA
in cashmere grey

Combination recommendation:
NEW:

Axum 9301

UVERO 301 design lock S

fast2fix
by GRIFFWERK

VAYA 128 LUCIA is available in three colours and with two rose shapes (round or square).

Stainless steel satin

Cashmere grey

Graphite black

More information on VAYA
at GRIFFWERK.DE

Rose with fine disk grinding,
exact curves and an installation height of just 6 mm.

All-round precision bevel,
even at the end of the handle.

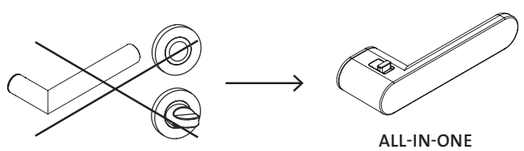

With its bevelled head section, the hinge complements the design of the door handle perfectly.

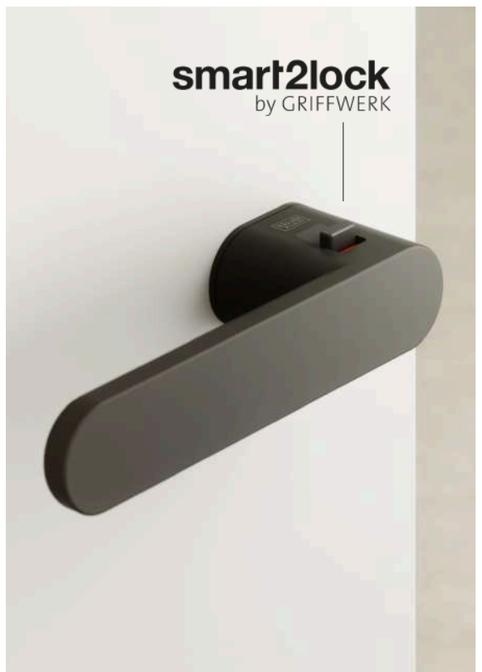

THE NEW AESTHETIC

ONE BY GRIFFWERK

ONE stands for maximum reduction and is the guiding vision of this design line. Roses have been dispensed with. All functions have been condensed into one form. In-house technology now allows the handle to emerge from the door as a singular form. It is nevertheless compatible with all doors with standard locks. One handle design for the most discerning demands. Available in two different versions and three finishes.

ALL-IN-ONE

R8 ONE

AVUS ONE

ONE HANDLES:
LESS IS MORE

Opulent material mix that invites
you to relax.

ONE IN NEW FINISHES

WHICH **ONE** ARE YOU?

smart2lock
by GRIFFWERK

Glamorous statement:
AVUS ONE in gold satin

Minimalistic overall concept
that lets thoughts come to rest.

Interior design is always an expression
of the personality of the client. A reflection of personal style and also the spiritof the times.
Our new gold satin and silk white finishes are fully in line with the trend towards coloured accents.
Which would be the ONE for you?

smart2lock
by GRIFFWERK

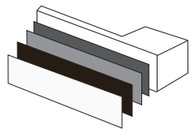

Understated elegance:
R8 ONE in silk white

REDUCED TO A MINIMUM

FRAME

Reduced to a minimum: The handle is arranged as a solitary statement on the door with all functions combined.
A patented technology developed by GRIFFWERK allows designers to dispense with roses entirely. FRAME can be supplied with an integrated locking mechanism. A minimalist solution for glass doors is also part of the design concept.
The inlays can be perfectly matched to the finish of the door.
White and black glass inlays can be ordered from GRIFFWERK.

Interchangeable inlays

Design:
Professor Thomas Gerlach

EXCLUSIVELY FROM GRIFFWERK

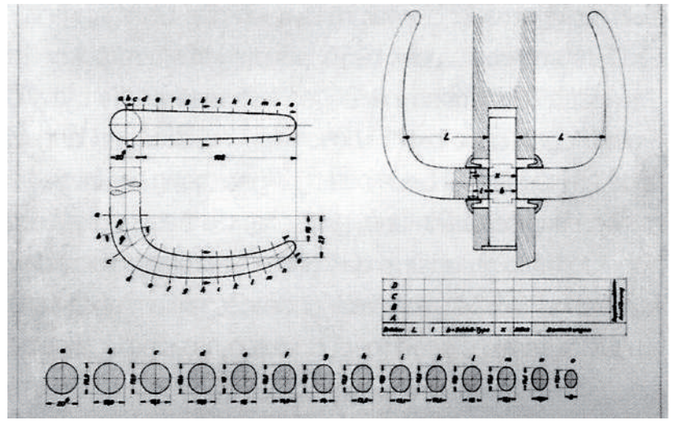

ULMER GRIFF | MAX BILL

Also available in graphite black

From 1952, Max Bill was head of the Architecture and Product Design department at HfG Ulm.
During this period, he worked with the student Ernst Moeckl to develop a door handle for the local university building. In 2012, GRIFFWERK redesigned this handle as faithfully as possible and in close cooperation with the max, binia + jakob bill foundation.

The ULMER GRIFF BY GRIFFWERK is the world's only officially licensed redesign of this handle and is, therefore, authorised to bear Max Bill's signature.

Archive drawing, image courtesy of the max, binia + jakob bill foundation, Adligenswil | © max, binia + jakob bill foundation

Originals from the archive of the Ulm School of Design.

INNOVATIVE THINKING MEETS ICONIC DESIGN

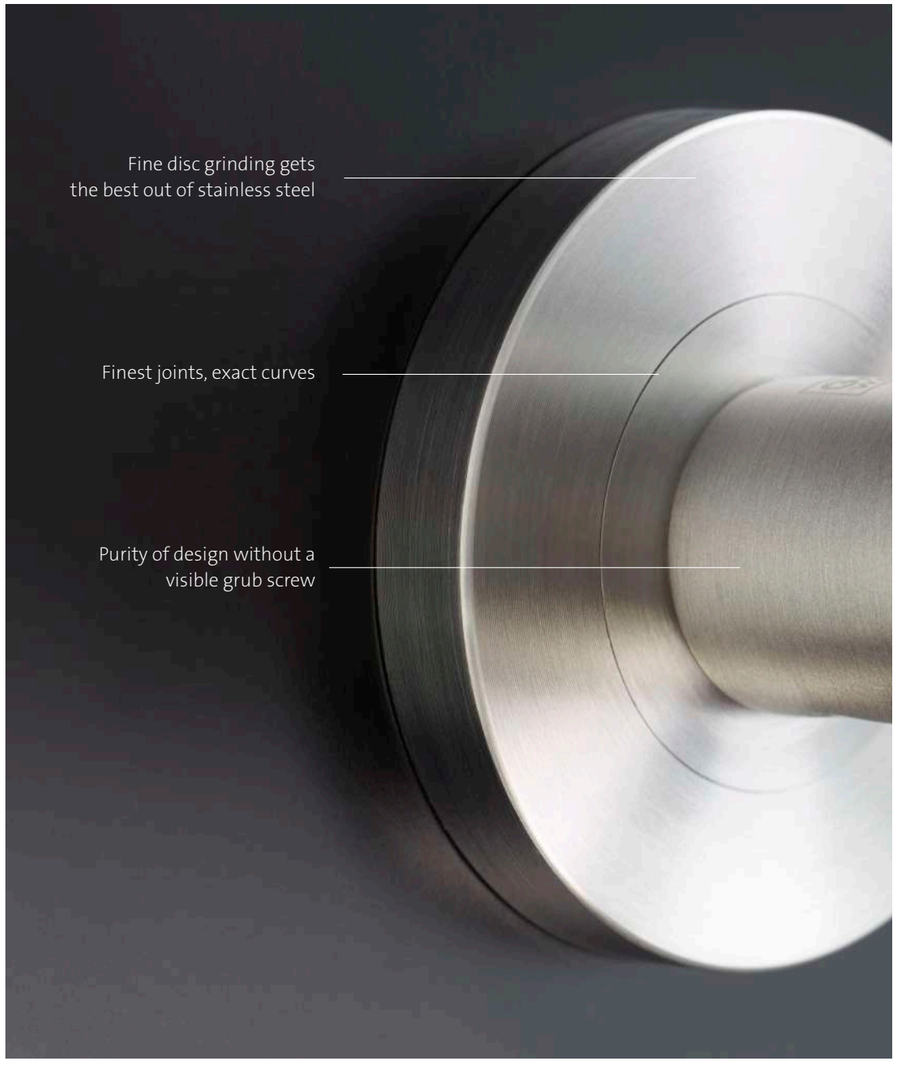

LUCIA. THE MASTERPIECE.

PERFECTION AS PASSION
We have re-imagined the timeless design classic LUCIA.
Technology, finishes, touch – we want everything about this door handle to be more than perfect, the “masterpiece by GRIFFWERK”. It embodies our total commitment to exceptional design, comfort and functionality.

QUALITY AS A PROMISE
How did we take the quality of the handle to the next level?
By handling production in-house. Only through in-house production can we achieve our high standards and refine every detail to perfection.

Disc grinding and precision bevel at the end of the handle.

Optimised diameter for a superior touch.

Minimum rose installation height of just 6 mm.

The grub screw is out of sight on the underside of the handle.

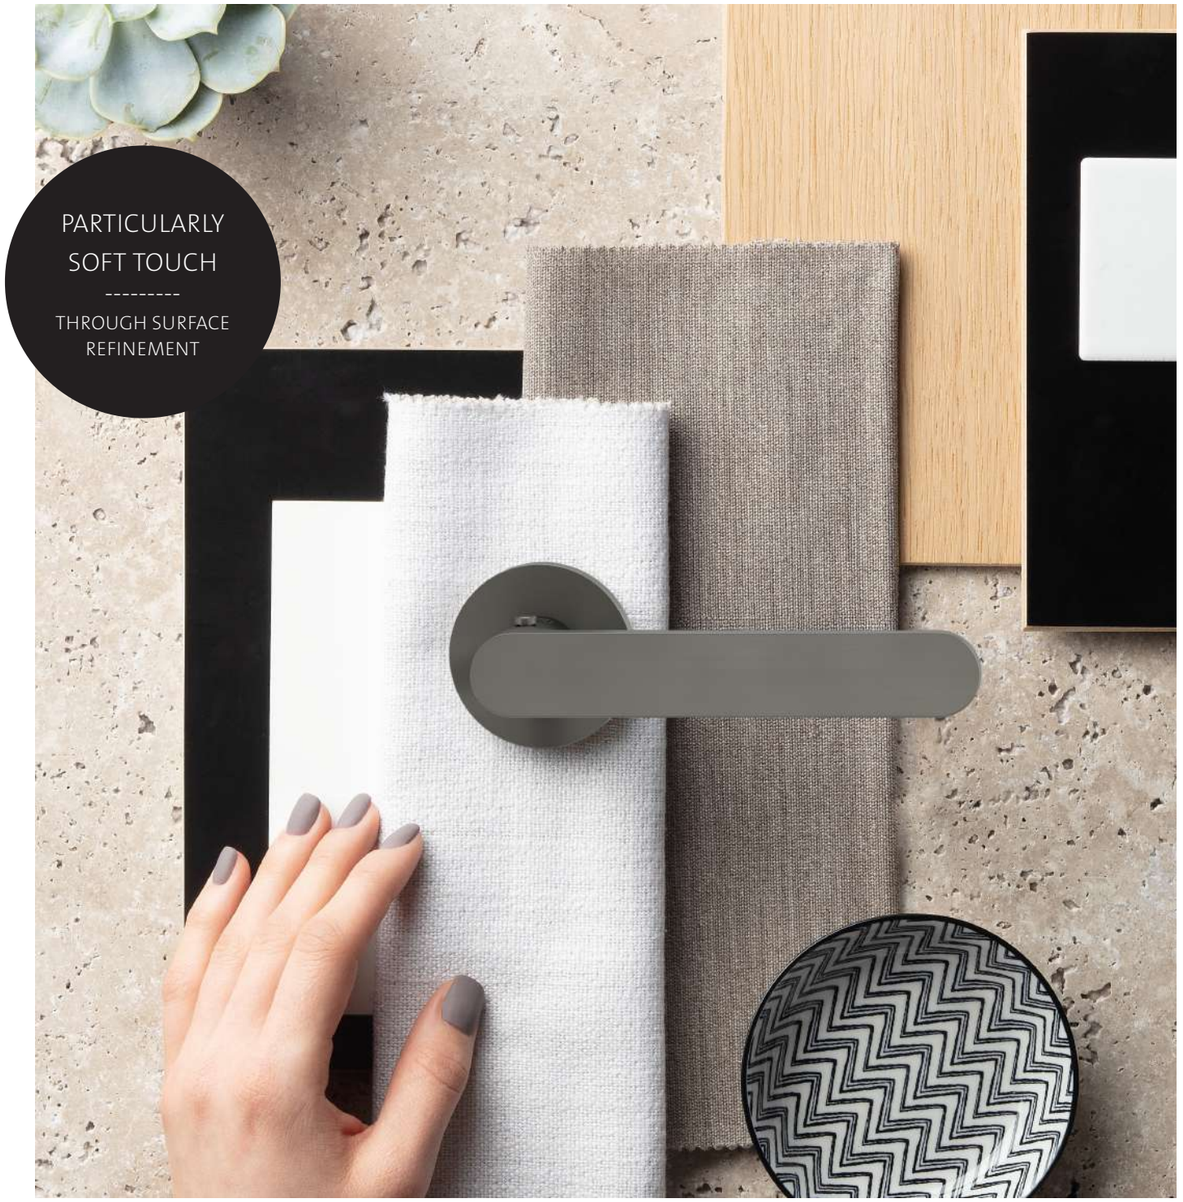

VERSATILITY AT EVERY LEVEL
The extensive design line offers the perfect solutions to meet the requirements of the most diverse construction projects. All versions are perfectly harmonised in terms of both technology and appearance.

PREMIUM SOFT2TOUCH SURFACES

A DELIGHT TO TOUCH

Say hello to Hygge! Cosiness, authenticity and understated elegance are at the heart of interior design trends. Your home should be a sanctuary – regardless of what is happening in the outside world. And this calls for a comforting, homely touch.
Warm colours and materials are steadily emerging as a contrast to the all-encompassing white of previous years. Our handles with the velvety soft2touch surfaces are the perfect addition.

PURISTO S with AVUS for full glass doors

Window handles

lock

MATCHING AXUM HINGES:
2 and 3-part hinges for wooden and steel frames

AXUM – THE PERFECT ACCOMPANIMENT

PERFECT PAIR IN CASHMERE GREY:
AXUM 9302 door hinge perfectly matches the CAROLA door handle

TWO GEMS:
AXUM 9303 door hinge and the FABIA door handle in brass

IDEAL COMBINATION:
AXUM 9305 door hinge and the ARIS door handle in graphite black

MATCHING LOOK:
LUCIA door handle and AXUM 9301 door hinge

Find the complete AXUM range from page 260 onwards.

PERFECTION DOWN TO THE SMALLEST DETAIL:
Discover AXUM – the matching door hinges to our handles in many design lines and finishes. The perfectly harmonised look takes the overall aesthetics of the door to a whole new level. And to ensure effortless installation, we have created a drilling template tailored to AXUM door hinges.

SPLENDID COMPANION:
AXUM 9304 echoes the design language of LUCIA SELECT.

THE PERFECT ADDITION:
AXUM 9301 perfectly matches the LUCIA door handle

UVERO DESIGN LOCKS

The two new UVERO design locks by GRIFFWERK bridge the final design gap for wooden interior doors. The rounded clip-on lock faceplate seamlessly matches the colour of the handles and hinges, thereby elegantly concealing the lock fastening and giving the door a uniform and minimalist look.

The exceptional design standards are reflected in the discreet, elegant appearance and, for UVERO 301, in a particularly small lock size with a compact 145 mm lock faceplate.

Equipped with a whisper catch for silent operation and a latch bolt lock, we combine effortless usability with refined design – creating perfection for doors and interiors.

PRODUCT FEATURES

– Mortice locks for interior wooden doors
– Durable and maintenance free, also ideal for frequently used doors
– Suitable for standard DIN interior doors with a backset of 55 mm / 72 mm distance to the centre of the cylinder
– Colour-coordinated clip-on lock faceplate
– Plastic whisper catch and latch with sturdy metal core
– Also suitable for smart2lock technique

UVERO 301 design lock S with ARIS smart2lock in graphite black.

UVERO 302 design lock with LUCIA ML in cashmere grey.

COMPLETE SYSTEM FOR YOUR DOOR

Everything you need for a functional and stylish door: Doors handles, door hinges mortice lock at GRIFFWERK.DE

UVERO 301 DESIGN LOCK S

★★★★
by GRIFFWERK

Lock faceplate length of just 145 mm

– Exceptional visual design standards, small and elegant
– Suitable for smart2lock locking mechanism
– Suitable for all standard strike plates
– Smaller lock pocket milling required for 145 mm lock faceplate length
– Built-in spring with high handle-holding torque and adjustable handle-centre position for a reliable, ergonomic grip

UVERO 302 DESIGN LOCK

★★★
by GRIFFWERK

– In graphite black; lock faceplate also available in other colours and with latch opening
– Robust and durable (high cycle test and latch retraction forces based on class 3)
– Deadlatch function (PC and ML): additional latch for secure locking
– Suitable for DIN lock pocket milling
– 5-year warranty on function

CLIP-ON LOCK FACEPLATES

(can be ordered separately)

Door and hinge-matching finishes:
Graphite black, cashmere grey, stainless steel satin, silk white, gold satin

PLANEO X

SO MUCH EASIER.
SO MUCH BETTER.

OPTIMAL TECHNOLOGY AT AN ATTRACTIVE PRICE
So much easier to store, configure and assemble – plus a very attractive price structure.
And much the better sliding door system for all applications.

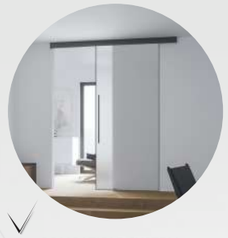

Splendid look in three finishes: Stainless steel effect, cashmere grey and graphite black.

The system is suitable for both glass and wooden doors.

YOUR ADVANTAGES WITH PLANEO X

COMPATIBLE SYSTEM
Can be combined with AIR, LOFT, SILENT and the smart2lock push handle

EASY ASSEMBLY
The same easy assembly for all weight classes.

VARIETY OF COLOURS

GLASS SYSTEMS
PLANEO X is ideally suited for full-glass systems

SIMPLE STORAGE
The modular system enables optimised storage.

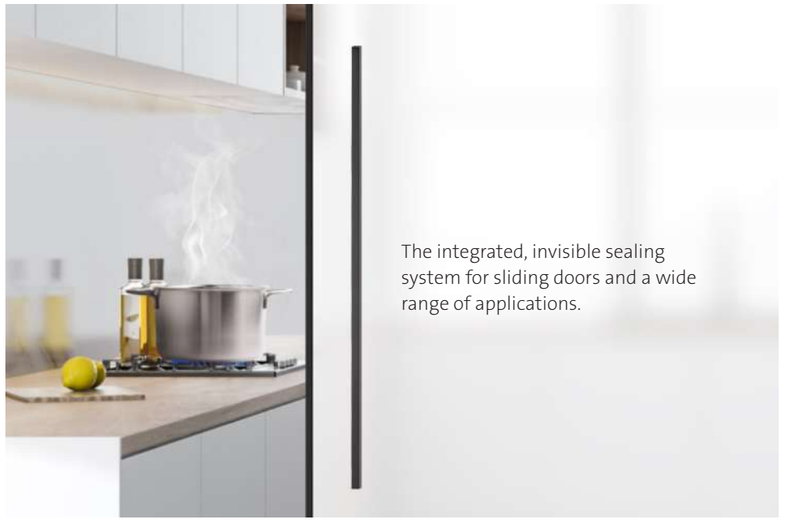

IMPRESSIVE SMOOTHNESS
Soft-close technology on both sides and precision rollers ensure exceptionally quiet door operation.

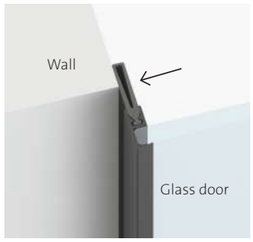

PLANEO AIR SILENT

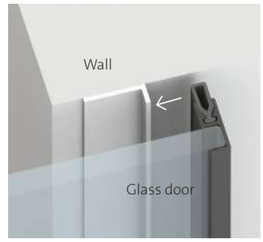

THE SLIDING DOOR THAT MAKES NO COMPROMISES.

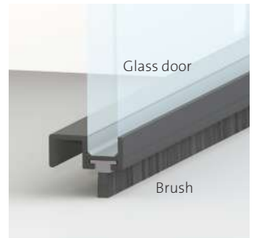

A typical argument against installing a sliding door has often been the lack of an effective seal.
Even if its elegant appearance and other added benefits, such as accessibility and and space efficiency, were truly compelling.
This problem has now been solved with PLANEO AIR SILENT!

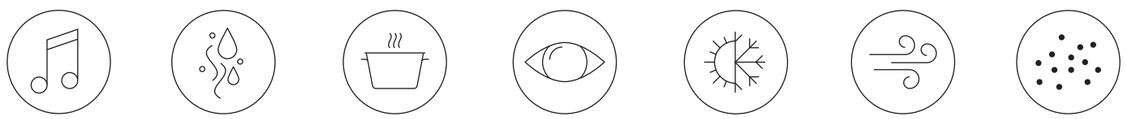

THE TECHNOLOGY: MAXIMALLY EFFECTIVE, MINIMALLY VISIBLE.

PROTECTS AGAINST:

PLANEO AIR SILENT

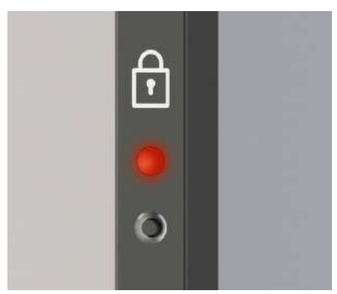

KITCHENS
– Keeps cooking smells and greasy food odours away from dining and living areas

HALLWAYS AND ENTRANCE AREAS
– Keeps out draughts
– Heat zones help cut heating costs
– A glass door between living area and hallway helps reduce noise from the staircase

BATHROOMS/EN SUITE BATHROOMS
– Water vapour does not enter adjacent rooms
– Damage due to moisture or mould are thus prevented
– Can even be locked with the PLANEO SMART2LOCK push handle
– Featuring frosted glass, PLANEO AIR SILENT ensures optimal privacy, without leaving even the slightest lateral gap

HOME OFFICE
– Undisturbed in the home office

IDEAL FOR RENOVATIONS
– Does not require a special frame solution
– Can be easily retrofitted
– Can be dismantled

smart2lock by GRIFFWERK

LOCKABLE WITH THE PLANEO SMART2LOCK PUSH HANDLE

The system can be optionally equipped with the PLANEO SMART2LOCK push handle. A button placed on the narrow push handle activates the locking function.

HARDWARE IN BLACK

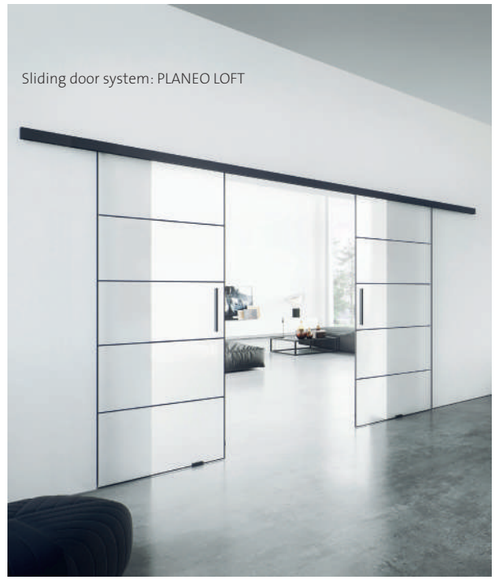

ALL IN BLACK

Large windows, high ceilings, authentic materials and an abundance of space, these are the things that make loft-style living so appealing. To add a touch of industrial loft style to your home does not necessarily require you to renovate an old factory building. Bold accents can be achieved with architectural elements that offer a contemporary loft aesthetic.
Hardware and doors are central design elements. GRIFFWERK offers a comprehensive range of black hardware.
All the design lines are available as complete systems. Our graphite black finish is not only exquisitely matt and premium in quality, it is also delightfully soft to touch.

INSPIRED BY GRAPHITE

We opted for an extra-matt, deep black that perfectly matches the window and door elements and enhances the loft-style character. A fine grain provides structure and depth.

PRIVACY WITH FROSTED GLASS DOOR

Thanks to all around-matted finish, even outlines are barely visible behind the glass.
Besides protecting your privacy, the FROSTED glass door fills rooms with natural light, thereby creating a cosy and welcoming atmosphere.

GLASS ART BY GRIFFWERK

BRIGHTEN UP ROOMS WITH GLASS DOORS

Whether in the crisp light of dawn or the warmth of the midday sun, every time of day puts your rooms “in a new light”. Glass doors have the ability to let this natural light flow freely.

PURISTO S lock case by GRIFFWERK perfectly matches your glass door. When equipped with smart2lock by GRIFFWERK, it enables particularly convenient operation: The door can be locked and unlocked with one hand. The locking latch sits perfectly within reach of your thumb.

Even the spring tension of the door handle can be finely tuned and the handle position adjusted with millimetre precision. The lock case is significantly smaller than conventional models, which gives the door a cleaner, more elegant appearance. Despite the new dimensions, PURISTO S does not require any special drillings and is compatible with the handles of the range.

Also available with
smart2lock by GRIFFWERK

Compatible with most handles of the range

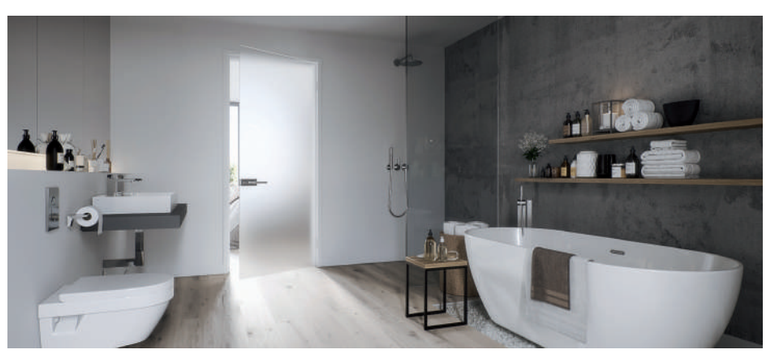

Suitable for all standard drillings (Studio)

Simple emergency release

FORM FOLLOWS EASE OF USE
Convenient single-handed operation

TECHNICAL CHARACTERISTICS
– Fits standard drillings (Studio)
– Ideal for use with right and left-hand locking version
– Preconfigured for 8 mm, optionally for 10 mm glass
– Studio lock case with 16 and 18 mm lever handle guide
– Triple lever handle guide guarantees stable handle guidance
– Set with 3-part hinges, incl. wooden frame parts
– Tested to 200,000 cycles based on DIN EN 12209
– Stainless steel lock case cover

Enjoy more light with glass doors, especially in interior bathrooms. With all the privacy you need.

PURISTO S is also available in cashmere grey, graphite black, gold satin and silk white finishes.

STANDARDS

EN 1906 - BUILDING HARDWARE

As part of the harmonisation of regional regulations across Europe, EN 1906 “Building hardware - Lever handles and knob furniture - Requirements and test methods” has been established. The latest version of EN 1906 was published in 2012 and is referred to as EN 1906:2012. EN 1906 forms a benchmark for comparing lever handle sets. The standard introduced usage categories, thereby creating an initial basic structure consisting of the categories of use 1 to 4. Classification into the categories of use is based, among other things, on four specific tests:

1. TORQUE STRENGTH OF THE SQUARE SPINDLE

2. TENSILE STRESS ON HANDLE SETS

3. FREE PLAY IN REST POSITION

4. FREE ANGULAR MOVEMENT

The defined limit values in the individual tests allow each set to be assigned to a category. The meaning of the categories is described as followed:

Category 1: Medium frequency of use by people with a high incentive to exercise care and with a small chance of misuse, e.g. internal residential doors;

Category 2: Medium frequency of use by people with some incentive to exercise care but where there is some chance of misuse, e.g. internal office doors;

Category 3: High frequency of use by public or others with little incentive to exercise care and with a high chance of misuse, e.g. office doors used by the general public.

Category 4: High frequency of use on doors which are subject to frequent force or damage, e.g. football stadiums, offshore installations (oil rigs), army barracks, public toilets, etc.

It should be noted that the relatively generous permissible limits can result in a significant variation in the quality of individual handle sets. Up to 6 mm of free play in the rest position (Category 4) would likely not be accepted by customers.

Additional options for comparing door handle sets arise from the correlation or classification key, which is also defined in EN 1906. These include, among other aspects, an endurance test, a corrosion resistance test and information regarding suitability for fire doors.

CLASSIFICATION KEY ACCORDING TO DIN EN 1906:2012

Classification key	Possible categories	Meaning
1 Category of use	1 - 4	1 = Medium frequency of use by people with a high incentive to exercise care and with a small chance of misuse, e.g. internal residential doors
		2 = Medium frequency of use by people with some incentive to exercise care but where there is some chance of misuse, e.g. internal office doors
		3 = High frequency of use by public or others with little incentive to exercise care and with a high chance of misuse, e.g. office doors used by the general public
		4 = High frequency of use on doors which are subject to frequent force or damage, e.g. football stadiums, oil rigs, army barracks, public toilets, etc.
2 Durability	6 - 7	6 = Medium frequency of use: 100,000 test cycles
		7 = Frequent use: 200,000 test cycles
3 Door mass	No classification	
4 Fire resistance	0, A - D	0 = No defined fire resistance
		A = Suitable for use on smoke resistant doors
		B = Suitable for use on smoke/fire resistant doors
		C = Suitable for use on smoke/fire resistant doors with handle insert requirements
		D = Suitable for use on smoke/fire resistant doors with handle core requirements
5 Safety	0 - 1	0 = For normal purposes
		1 = In case of safety applications
6 Corrosion resistance	0 - 5	0 = No defined corrosion resistance
		1 = Mild corrosion resistance
		2 = Moderate corrosion resistance
		3 = High corrosion resistance
		4 = Very high corrosion resistance
		5 = Extremely high corrosion resistance
7 Security	0 - 4	0 = No defined burglary resistance
		1 = Mild burglary resistance
		2 = Moderate burglary resistance
		3 = High burglary resistance
		4 = Extremely high burglary resistance
8 Hardware design	A, B or U	A = Spring-assisted hardware
		B = Spring-loaded hardware
		U = Unsprung hardware

EN 1906 & DIN 18257 - PROTECTIVE HARDWARE

EN 1906 Annex A specifies the requirements and test procedures for protective hardware.
Protective hardware is classified in 5 possible burglary resistance classes at the 7th digit in the correlation key of EN 1906.
Burglary resistance class 0 is not listed in the correlation table shown below.
The national supplementary standard DIN 18257 also specified the designations ES 0 to ES 3. The supplementary standard DIN 18257 was absorbed into the European standard EN 1906. In parallel, DIN EN 1627 was developed further.
It deals with the burglary protection of complete elements, while EN 1906 only deals with the hardware as such.
The following correlation table serves to compare the various standards.

HARDWARE		DOORS			
DIN 18257	**DIN EN 1906**	**DIN EN 1627: 1999**	**DIN EN 1627: 2011**	**RESISTANCE TIME**	**PERPETRATOR CONDUCT**
ES 1	S 1	RC 1	RC 1 N	0	Components of resistance class RC 1 N only have low protection against use of levers.
ES 1	S 2	RC 2	RC 2 N | RC 2	3 min.	The opportunist perpetrator tries to additionally break open the locked and latched component with simple tools, such as screwdrivers, pliers and wedges.
ES 2	S 3	RC 3	RC 3	5 min.	The perpetrator additionally tries to break open the locked and latched component with a second screwdriver and a crowbar, as well as with a simple drill.
ES 3	S 4	RC 4	RC 4	10 min.	The experienced perpetrator also uses saws and impact tools, such as an axe, pry bar, hammer and chisel, as well as a cordless drill.
		RC 5	RC 5	15 min.	The experienced perpetrator also uses power tools, such as a drill, jigsaw or reciprocating saw and angle grinder with a max. disc diameter of 125 mm.
		RC 6	RC 6	20 min.	The experienced perpetrator also uses high-performance power tools, such as a drill, jigsaw or reciprocating saw and angle grinder.

DIN 18273 FIRE DOOR HARDWARE

FIRE PROTECTION

LEVER HANDLE UNITS FOR FIRE DOORS AND SMOKE CONTROL DOORS

TERMS AND DEFINITIONS, DIMENSIONS, REQUIREMENTS, TESTING

DIN 18273 is a national standard for all types of lever handle units for fire doors and smoke control doors, each as single and double leaf hinged doors. Lever handle units are designed to ensure that the function and protective effect of the hardware are ensured even after extended use, i.e. permanently, if used and maintained appropriately and properly.

A lever handle according to DIN 18273 is a hardware item consisting of several components that form an assembly. This assembly is tested and approved as a whole unit. The approval therefore only applies to the entire assembly. It is not permissible to assemble door handle units from individual components, even if they have been tested according to this standard as individual components.

GRIFFWERK GMBH
LINDENSTRASSE 90
89134 BLAUSTEIN | GERMANY
WWW.GRIFFWERK.DE
DIN 18273 FS
ift
ROSENHEIM

Tests according to DIN 18273 are always documented by a certificate.

An essential component is in-house production checks and externally monitored production along with annual audits by accredited institutes. As a mark of quality you will find the “Ü” mark on the packaging.

EN 179 EMERGENCY EXIT DEVICES

PANIC

EN 179 specifies the requirements for production, suitability for use and testing of emergency exit devices. It applies to closures in escape and rescue routes that are used by persons who are familiar with the technology of the escape and rescue route. Panic of the users is considered unlikely in this case. Emergency exit devices make it possible to release the emergency exit by means of a hand lever. The shape of an emergency exit device is subject to dimension requirements. These requirements are specified in EN 179. One important aspect of EN 179 is testing of the hardware in connection with the lock. Only combined testing of the lock and hardware can ensure that the function of the emergency exit according to EN 179 is met.
The association of the lock and hardware is ensured by the marking system.

by GRIFFWERK

WC right
Internal handle with closing knob facing right, for DIN left door opening outwards or for DIN right door opening inwards.

WC left
Internal handle with closing knob facing left, for DIN left door opening inwards or for DIN right door opening outwards.

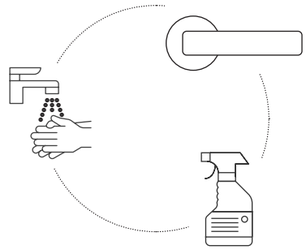

GENERAL NOTES ON THE FINISH
Slight colour deviations due to production technology are unavoidable, especially across different delivery batches. During daily use, the finish may be scratched by, for example, finger rings, keys, boxes, etc. These marks can often be removed by simply wiping them off. If deeper scratches cannot be removed completely, they may impact the aesthetic appearance but not the function.

NOTES ON STAINLESS STEEL
Griffwerk does not just limit itself to appealing exterior design – we are also extremely proud of the inner values of our products. We exclusively use stainless steel of alloy 304, also known as 1.4301. This high-quality stainless steel is, due to its composition, a stainless steel with special corrosion resistance and strength. Stainless steel forms a very thin protective passive layer that rebuilds itself even after surface damage due to chemical reactions.

NOTES ON ZINC
Zinc, or the zinc alloy known as zamak, can be individually cast and shaped using the zinc die-casting process. It is precisely these properties that make zinc the ideal material for our products with exceptional shapes and high design standards. The GRIFFWERK zinc die-cast handle sets offer the freedom to explore and develop shapes. After the final grinding, zinc die-cast sets receive their final finish and are refined. Whether chrome gloss or satin finish – the possibilities are endless.

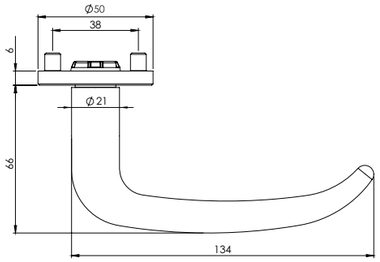

To avoid infection via contaminated surfaces, we recommend watching our explanatory video.

INTERIOR DESIGN WITH STYLE

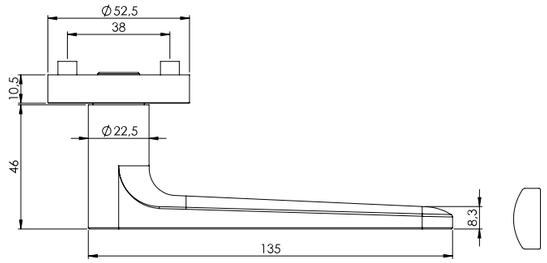

Throughout all periods of art history, magnificent door fittings bear witness to the high art of blacksmithing and engraving. Whether in the style of the Baroque, Empire, or the diversity of historicism, fittings adorn the elegant doors of a city villa or complement the cozy country house style as an additional design element.

SECURITY HARDWARE

EFFECTIVE BURGLARY PROTECTION

THE WAY TO BE SAFE

EFFECTIVE BURGLARY PROTECTION FOR YOUR HOME TO DIN 18257

- ✓ Our security handle sets can be combined with nearly all GRIFFWERK rose sets, allowing you to keep the overall look of the building complete.
- ✓ Cylinder cover (CC) made of hardened stainless steel
- ✓ Available in resistance class ES0 and ES1 (certified to DIN 18257, find certificates at www.griffwerk.de)

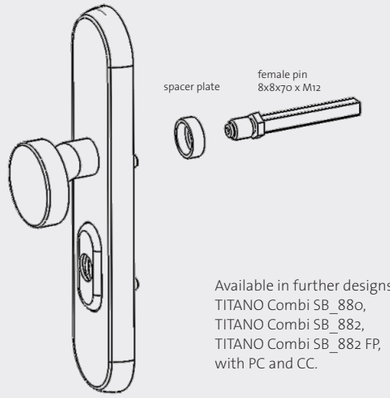

On average, a burglary or break-in happens every four minutes in Germany. The weakest point in any home is the front door. Contrary to popular belief, 80% of burglaries take place during the day when the residents are not at home (preferably between 10am and 1pm).

Apartment buildings are a particularly popular target. Although 75% of all burglaries occur in apartment buildings, insufficient attention has been paid in the past to securing apartment front doors.

SECURITY HARDWARE KIT
CONSISTING OF THREE PARTS - PLEASE ORDER ALL THREE!

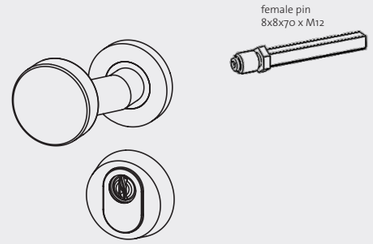

EXTERNAL SECURITY HARDWARE

Available in further designs,
TITANO Combi SB_880,
TITANO Combi SB_882,
TITANO Combi SB_882 FP,
with PC and CC.

/

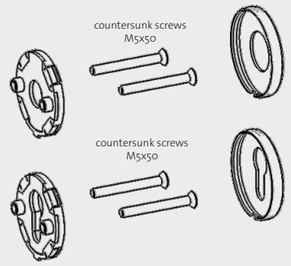

EXTERNAL SECURITY ROSE SET

Available in further designs
with R1, R2, R3 and R4 knobs
and PC and CC.

+

INTERNAL COMBI INTERNAL ROSE SET

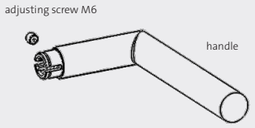

Available in further designs, round or square,
with and without ornamental ring,
and in all finishes (see page 264).

! Combi internal rose sets always consist of a handle and key rose with substructure and screws for 38 - 50 mm thick doors.

+

INTERNAL SINGLE HANDLE

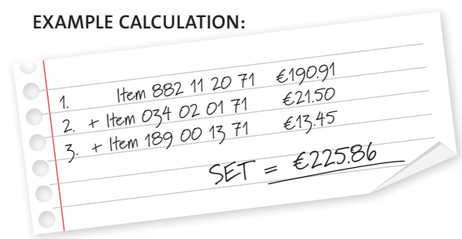

Can be combined with almost all handles
from the Griffwerk range.
(See respective handle page/product family).

PLANNING AIDS FOR DOOR CALCULATION PLANEO X60, X80, X120 GLASS:

WALL/CEILING MOUNTING:

Glass width for single leaf system = clear passage width + 60 mm
Glass width for double leaf system = clear passage width + 56 mm) divided by two
Glass height for wall mounting = clear passage height + min. 29 mm
(applies to single and double leaf systems)
Glass height for ceiling mounting = clear passage height - 54 mm
(applies to single and double leaf systems)
Glass insert = 16 mm
Min. glass width = 750 mm (for glass height <= 2058 mm)
Min. glass width = 850 mm (for glass height > 2058 – 2200 mm)

Door height for wall mounting = clear passage height + 4 mm
(applies to single and double leaf systems)
Door height for ceiling mounting = clear passage height - 79 mm
(applies to single and double leaf systems)

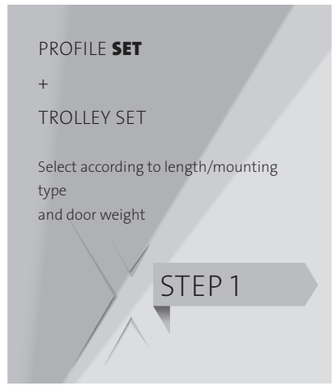

MOUNTING IN FRONT OF FRAME

Glass width = overall cladding dimension
Glass height = overall cladding dimension + min. 9 mm
Glass insert = 16 mm

Please note that to ensure optimal performance of the sliding door, the width to height ratio of the panes must not exceed 1:2.75.

Door height = outer frame dimension -16 mm

PLANEO X

OPTIMAL TECHNOLOGY AT AN ATTRACTIVE PRICE

So much easier to store, configure and assemble – plus a very attractive price structure. And much the better sliding door system for all applications.

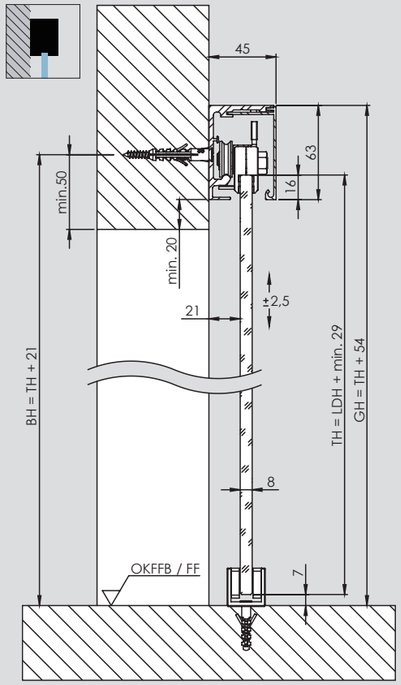

– **Compatible system:** Can be combined with AIR, LOFT, SILENT and the smart2lock push handle
– PLANEO X is ideally suited **for full glass systems**
– **Easy assembly** for all weight classes
– **The modular system** enables simple storage
– **Impressive smoothness** due to soft closing on both sides and rollers

GRIFFWERK
Sliding door systems are equipped with **SENSA SYSTEM** technique. Two »dual glass clamps« hold the door securely and gently in position.
SENSA SYSTEM-TECHNIK VARIABEL **OHNE** GLASBOHRUNG

WALL MOUNTING

GLASS DOORS

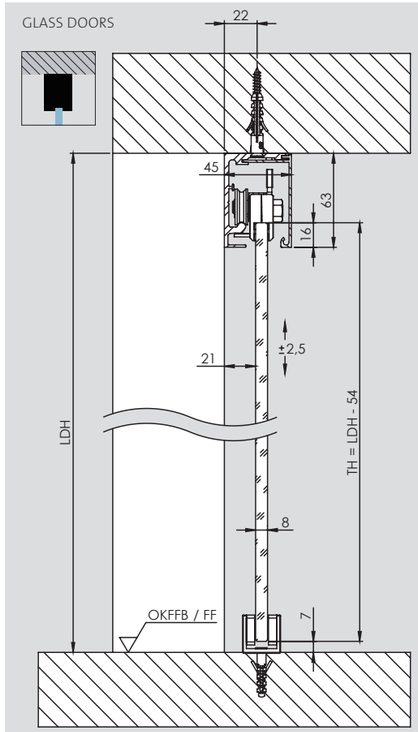

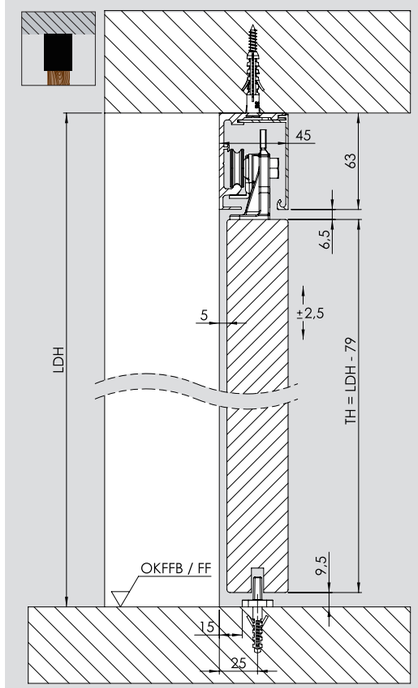

WOODEN DOORS

CEILING MOUNTING

GLASS DOORS

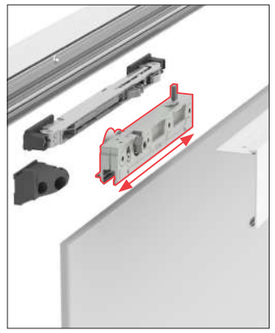

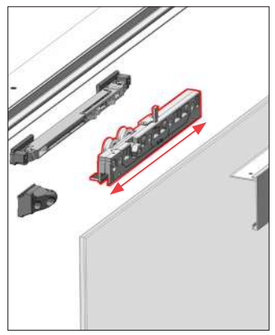

OPTIMISED TECHNOLOGY.
EASY ASSEMBLY.

The only difference between the three weight classes is the trolley.
The assembly steps are therefore the same for all the versions. Moreover, the SOFTCLOSE activator is already integrated on the trolley. Yet another time saving bonus during assembly.

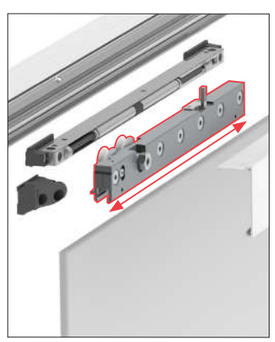

PLANEO X60 with one roller

PLANEO X80 with two rollers and enlarged clamping surface

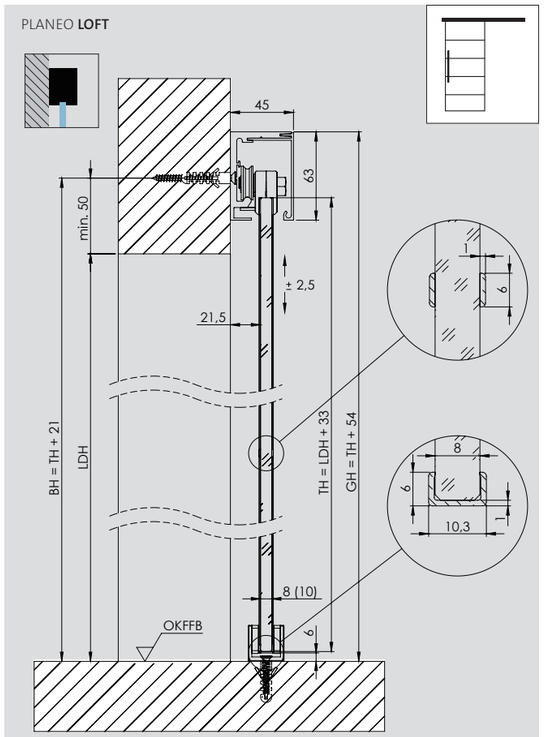

PLANEO X120 with two rollers

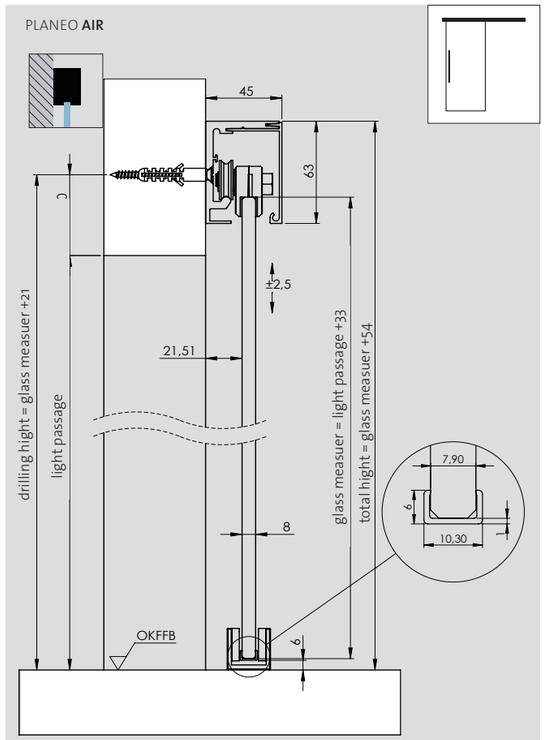

WALL MOUNTING

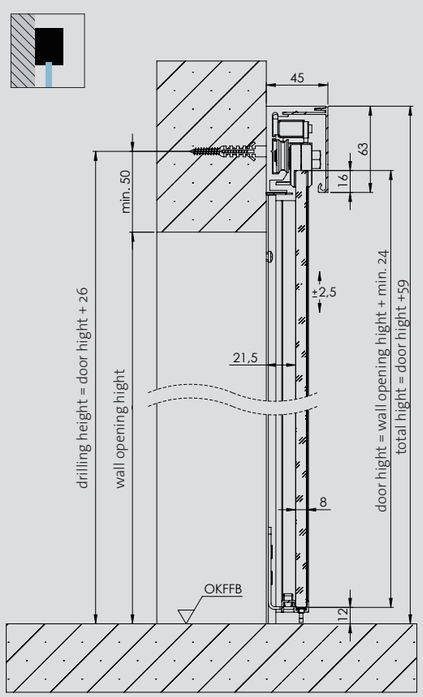

PLANEO **LOFT**

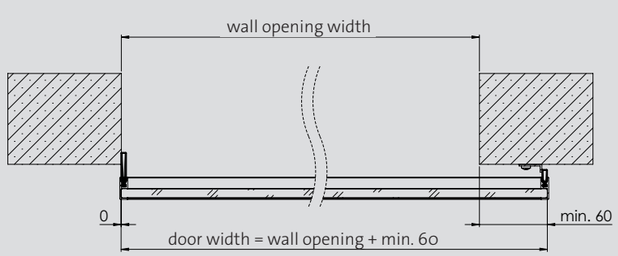

PLANEO **AIR**

PLANEO **AIR SILENT**

IMPORTANT NOTE For technical reasons, PLANEO AIR SILENT requires a maximum clearance of 4.5 mm from the wall.

SLIDING DOOR SYSTEMS

SLIDING DOOR SYSTEM WITH FRAME AND TRANSOMS

The charm of loft-living is undeniable. Real factories and old production halls are rare. Luckily, with PLANEO AIR LOFT the loft look is not just restricted to people with access to large industrial spaces. The structured glass surface draws inspiration from the transom windows of traditional industrial architecture.

PLANEO LOFT-1

PLANEO LOFT-2

Find the matching sliding door system from page 298 onwards.

– Possible designs: Single leaf, double leaf
– Min. glass door width: 750 mm
– Min. glass height: 2058 mm
– Other glass types, decorative elements and special dimensions on request
– Find matching push handles and pull recesses from page 316 onwards.

GERMAN DESIGN AWARD WINNER 2019

reddot award 2017 winner

PLANEO AIR – INTEGRITY AND LIGHTNESS

SLIDING DOOR SYSTEM WITH AN ELEGANT FRAME

The profile, like a discreet picture frame, encompasses the glass and turns the entire door into a unique design element within the room. Besides the aesthetic added value, the profile offers additional protection for the glass edge.

Find the matching sliding door system from page 310 onwards.

– Frame **protects** the most delicate part of the door – **the glass edge** against breakage
– **Robust design** due to encompassing frame
– **Door is more visible** without the need for a complex glass design
– **Thin profile frame** becomes an elegant design element within the room

To ensure maximum **PRIVACY,** we recommend combining the profile with the **smart2lock PLANEO GS push handle 49017,** see page 330.

NOTES:

– Sliding door system and handle are not included in the set
– Suitable for 8 mm TSG and 8.8 mm LSG doors with max. glass door dimension: 1100 x 2200 mm
– Suitable for 10 mm TSG and 10.8 mm LSG doors
– The frames are fitted to the glass at the factory, frame cannot be purchased separately without glass.
– Possible designs: Single leaf, double leaf
– Min. glass door width: 750 mm (for glass height 2058 mm)
– Other glass types, decorative elements and special dimensions on request
– Calculation of special doors: Price of special door plus additional charge for Air frame €373.00

Set contents:

SNOWWHITE_501 glass door, incl. PLANEO AIR frame with stainless steel effect satin/C31, cashmere grey or graphite black

PLANEO AIR SILENT – THE SLIDING DOOR THAT SHUTS TIGHT

SEAL SYSTEM FOR SLIDING DOORS

A typical argument against installing a sliding door has often been the lack of an effective seal. Even if its elegant appearance and other added benefits, such as accessibility and and space efficiency, were truly compelling. With PLANEO AIR SILENT, this problem has now been solved!

– **Noise insulation**, comparable to a wooden door
– **Seals in vapours and odours:** ideal for kitchens and bathrooms
– **Prevents draughts**, retains heat in the room
– Greater privacy thanks to **side privacy shield**
– System is **invisible** from the outside, thereby retaining the pure look of the door

Find the matching sliding door system from page 310 onwards.

NOTES:

– **Sliding door system, accessories set and handle are not included in the set**
– Available with soft closing
– For technical reasons, PLANEO AIR SILENT has a max. clearance of 4.5 mm from the wall.
– Suitable for 8.0 mm TSG doors with max. glass door dimension: 1100 x 2200 mm
– The frames are fitted to the glass at the factory, frame cannot be purchased separately without glass.
– Possible designs: single leaf
– Min. glass door width: 750 mm (for glass height 2058 mm)
– Other glass types, decorative elements and special dimensions on request
– Calculation of special doors: Price of special door plus additional charge for Air Silent frame €373.00

Set contents:

SNOWWHITE_501 glass door, incl. PLANEO Silent frame with stainless steel effect satin/C31, cashmere grey or graphite black

More lightness, more planning reliability

PURE SENSA | Push handle with adhesive technique

Description	Stainless steel effect satin	PU
Push handle pair for glass 350x40x58 mm SENSA technique without drilling	490020112 **€199.65**	10
Strip handle pair (strip handle thickness 7.5 mm) for glass 350x40x7.5 mm SENSA technique without drilling	490020312 **€57.46**	10
Push handle with strip handle on one side (strip handle thickness 7.5 mm) for glass 350x40 mm SENSA technique without drilling	490020212 **€128.56**	10

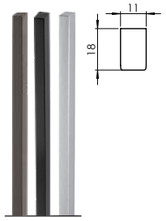

LUCIA GST | Push handle with adhesive technique

Description	Stainless steel effect satin	Graphite black	Cashmere grey	PU
Push handle pair for glass 450x25x56 mm SENSA technique without drilling	490150112 **€144.88**	490150118 **€170.05**	490150117 **€170.05**	10
Strip handle pair (strip handle thickness 7.5 mm) for glass length: 430 x 25 x 7.5 mm SENSA technique without drilling	490150312 **€76.32**	490150318 **€101.49**	490150317 **€101.49**	10
Push handle with strip handle on one side (strip handle thickness 7.5 mm) for glass length: 450 x 25 mm SENSA technique without drilling	490150212 **€110.57**	490150218 **€135.75**	490150217 **€135.75**	10

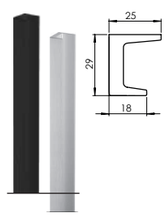

CIRCLE | Recessed pull with adhesive technique

Description	Aluminium EV1	Stainless steel effect satin	Graphite black	Cashmere grey	PU
Recessed pull pair for glass diameter 60 mm, height: 10 mm SENSA technique without drilling	491010111 **€53.33**	491010112 **€53.33**	491010118 **€59.60**	491010117 **€59.60**	10

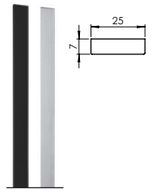

PLANEO GS_49011 | Push handle with adhesive technique

Description	Graphite black	Cashmere grey	Stainless steel effect satin	PU
Push handle pair for glass length: 700 mm SENSA technique without drilling	490110118 **€76.32**	490110117 **€101.49**	490110112 **€76.32**	10
Push handle pair for glass length: 260 mm SENSA technique without drilling	490110218 **€47.53**			10

PLANEO GS_49013 | Push handle with adhesive technique

Description	Graphite black	Stainless steel effect satin	PU
Push handle pair for glass length: 550 mm SENSA technique without drilling	490130118 **€102.18**	490130112 **€102.18**	10
Push handle with strip handle on one side (strip handle thickness 7.5 mm) for glass length: 550 mm SENSA technique without drilling	490130218 **€89.24**	490130212 **€89.24**	10

PLANEO GS_49014 | Push handle with adhesive technique

Description	Graphite black	Stainless steel effect satin	PU
Strip handle pair (strip handle thickness 7.5 mm) for glass length: 550 mm SENSA technique without drilling	490140318 **€76.32**	490140312 **€76.32**	10

PLANEO GM_49111 | Recessed pull with adhesive technique

Description	Graphite black	PU
Recessed pull pair with brass inlay for glass diameter 60 mm, height 11 mm SENSA technique without drilling	491110118 **€64.54**	10
Recessed pull pair with copper inlay for glass diameter 60 mm, height 11 mm SENSA technique without drilling	491110218 **€64.54**	10

For coated, sand-blasted and textured surfaces, we recommend push handles and recessed pulls with **screw-on technique**

Lockable push handle – PLANEO smart2lock

INTEGRATED LOCKING MECHANISM – FOR MAXIMUM PRIVACY WITH SLIDING DOORS

A solution that eliminates complex wall constructions without compromising on design.
PLANEO smart2lock offers maximum benefits but remains invisible. The lock engages invisibly within the sliding system via an electric rotation motor. Signal transmission via infrared light works just like a TV remote. Locking and unlocking is at the press of a button; the red LED indicates whether the door is locked. A low battery status is indicated by a flashing signal. Quick and easy emergency unlocking, with purely mechanical operation, if required.

Bluetooth®

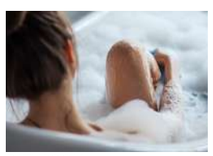

smart2lock

ORDER SHEET LASER INDIVIDUAL IMAGE & TEXT

FIVE STEPS TO YOUR INDIVIDUAL GLASS DOOR:

DIMENSION SHEETS
are also available online at
WWW.GRIFFWERK.DE/DOWNLOADS

1 Selecting door

☐ HINGED DOOR

Please enter clearance dimension
(frame rebate dimension)*:
Width x height
(max. 1650 x 2600 mm)

or select standard dimension

☐ 709 x 1972 ☐ 709 x 2097
☐ 834 x 1972 ☐ 834 x 2097
☐ 959 x 1972 ☐ 959 x 2097

☐ SLIDING DOOR

Please enter clearance dimension
(wall opening)**
Width x height
(max. 1650 x 2600 mm)

or select standard dimension

☐ 935 x 2058
☐ 935 x 2183

Important: Please specify the DIN direction!

Caution: Without separate dimensions for hinge drillings and lock drillings, the aforesaid standard applies. For special dimensions, please also use the appropriate dimension sheet (from Seite 320 onwards).

2 Submitting order form

Submit the completed order form to your chosen specialist retailer.

3 Sending data formats

Please select **your digital photo** and send it to bestellungen@griffwerk.de.
IMPORTANT! To obtain a high-quality result, certain requirements must be met:

– In general, GRIFFWERK recommends portrait format image for doors.
– Files should adhere to a minimum of 72 dpi while retaining their actual size. An image at 72 dpi cannot be enlarged.
– With a 834 x 1972 mm door, 72 dpi = 2365 x 5590 pixels
– Files with a resolution of 300 dpi at actual size are ideal.
– Files can be submitted as .jpg, .psd, .png, .tif as well as a vector file .ai or .eps.
– Check your photo in your default viewer. Right click under Properties to view the parameters.

Please select **your text file** and send it to bestellungen@griffwerk.de.
IMPORTANT! To obtain a high-quality result, certain requirements must be met:

– The text file must be made available to GRIFFWERK as a vector or path file, suitable file formats are .pdf, .eps and .ai.

4 Release

Your individual photo/text will now be digitally inserted into your door by GRIFFWERK and sent to your email address for final release, with a request for approval.

5 Shipping to your retail outlet

General Terms and Conditions of Sale and Delivery of GRIFFWERK GmbH

1.0 EXCLUSIVE APPLICABILITY OF THESE GENERAL TERMS AND CONDITIONS TO TRANSACTIONS WITH COMPANIES, BODIES CORPORATE ORGANISED UNDER PUBLIC LAW AND SPECIAL FUNDS UNDER PUBLIC LAW AND GENERAL PROVISIONS.

1.1 These General Terms and Conditions of Sale and Delivery (hereinafter referred to as "General Terms and Conditions") shall exclusively apply to transactions with companies, legal entities and special funds under public law carrying on a trade or independent business at the time the contract is concluded. Our General Terms and Conditions shall apply to all our offers, contracts and deliveries with such customers without any exceptions.

1.2 The customer's general terms and conditions shall not be binding on us, even if we fail to object to them upon receipt thereof. This means that in case of any conflict between our General Terms and Conditions and the customer's general terms and conditions, our General Terms and Conditions shall apply exclusively. Therefore, any additional and/or complementing regulations contained in the customer's general terms and conditions, which are not part of these General Terms and Conditions, shall not become part of the contract.

2.0 CONCLUSION OF CONTRACT AND PRICES

2.1 Our offers are without engagement. We reserve our and our suppliers' property rights and copyrights to offers, drawings and other documents (irrespective of whether in tangible or intangible, including in electronic form). Such information must not be disclosed to third parties and must be returned to us immediately upon request.

2.2 Any illustrations contained in our brochures, advertisements, on our website, etc. shall be non-binding.

2.3 The customer shall be bound by their order for a period of 2 weeks. Such period of time shall commence upon receipt of the order in our office. The contract shall not be deemed concluded unless we confirm acceptance of the order in writing and/or execute the order within such period of 2 weeks.

2.4 All agreements, in particular any collateral agreements and subsequent changes to the contract, shall not be effective unless made in writing. The same shall apply to any covenants as well as to any changes and/or amendments of our General Terms and Conditions.

2.5 Deliveries may deviate from the ordered total quantity by up to 10%.

2.6 Our prices are stated net ex works our warehouse and/or the manufacturing facility. Therefore, statutory VAT, costs for packaging, loading and shipment as well as customs duties, charges and other public dues for exports are added to the price.

2.7 Minor deviations from our stated measurements, weights and performances, as customary in the industry and caused by technical improvements, shall be admissible.

2.8 We shall assume no guarantees, unless specifically agreed upon. Such agreement must be in writing in order to be valid. Any reference to DIN standards shall only support the description of the subject matter of the contract and shall not be deemed to be a guarantee.

2.9 A fax transmission shall be sufficient in order to comply with the written form provided for in section 2.4 and section 2.8 of these General Terms and Conditions; otherwise, a transmission by telecommunication means, in particular by email, shall not be sufficient.

3.0 TERMS OF PAYMENT

3.1 Payment shall be due without any deductions within 30 days after delivery and invoicing.

3.2 We shall be entitled to execute outstanding deliveries and services against prepayment or provision of security if we find out after the conclusion of contract that payment is uncertain because of the customer's lack of financial capacity.

3.3 Orders to pay, cheques and bills of exchange shall only be accepted upon special agreement and - taking into consideration any expenses for collection and discount - only on account of performance.

3.4 Default interest of 8% above the base rate shall be charged in accordance with section 288, paragraph 2 of the German Civil Code.

4.0 RIGHT OF SET-OFF AND RETENTION

4.1 The customer shall not be entitled to set off any claims against outstanding payments due to us unless such claims are undisputed or recognised by declaratory judgement.

4.2 The customer shall only be entitled to assert a right of retention if such right of retention is based on the same contract.

5.0 DELIVERY AND DELAY IN DELIVERY

5.1 Delivery dates and periods, which may be agreed upon in a binding or non-binding manner, must be stated in writing.

5.2 Delivery periods shall commence upon conclusion of the contract, however, not before all technical and commercial details are agreed upon with the customer. To the extent shipment of the goods was agreed upon, terms and dates of delivery refer to the time the goods are handed over to the carrier, forwarder or other third party commissioned to effect transport.

5.3 If a non-binding date of delivery or period of delivery is agreed upon, we shall not be deemed to be in delay before the expiry of a period of 2 weeks after such date and/or end of such period of delivery. In order for us to be deemed in delay of delivery, a written notice from the customer is required (reference is made to section 286, paragraph 1 of the German Civil Code).

5.4 In case of industrial disputes, of the occurrence of unforeseeable impediments beyond our sphere of responsibility as well as of impediments in the manufacturing facility's sphere of responsibility, the date and/or end of the period of delivery shall be postponed by a period of time that corresponds to the duration of such event. The same shall apply mutatis mutandis to impediments occurring during an existing delay in delivery.

5.5 The customer's right to claim damages (section 280, paragraph 1 and paragraph 2 of the German Civil Code in conjunction with section 286 of the German Civil Code)
based on a delay in delivery for slight negligence shall be limited to a maximum of 5% of the agreed upon (net) purchase price. The customer's right to claim any additional damages due to a delay in delivery shall be excluded in case of slight negligence. The customer shall in particular not be entitled to demand damages (section 280, paragraph 1 and paragraph 3 of the German Civil Code in conjunction with section 281 of the German Civil Code) instead of performance in case of a delay in delivery caused by slight negligence.

6.0 TRANSFER OF RISK AS WELL AS SHIPMENT AND ACCEPTANCE OF THE PURCHASED ITEMS

6.1 The risk shall be transferred to the customer at the time the purchased items are handed over to the forwarder, carrier or person collecting the purchased items, however, at the time the purchased items leave our premises or the manufacturing facility at the latest. The same shall apply mutatis mutandis if we are responsible for the transport of the purchased items. If the shipment of the purchased items is delayed due to circumstances beyond our sphere of responsibility, the risk shall pass to the customer as of the date the purchased items are ready for dispatch.

6.2 We shall obtain insurance against transport damage for the purchased items upon the customer's express request and at the customer's expense exclusively.

6.3 We shall not be obliged to select the cheapest method of transport. The customer shall not be entitled to claim damages for wrong shipment or defective packaging caused by slight negligence.

6.4 Without prejudice to the customer's rights stipulated in section 10 of these General Terms and Conditions, the customer shall be obliged to accept delivered goods, even if they show minor defects.

7.0 ACCEPTANCE

7.1 The customer shall be obliged to accept the purchased items at our corporate seat within 8 days after the date the purchased items were ready for dispatch as notified by us in writing. If the customer fails to accept the purchased items, we shall be entitled to avail ourselves of our statutory rights.

7.2 If we demand damages instead of performance, such damages shall amount to 10% of the agreed upon (net) purchase price. The amount of such damage shall be set higher or lower if we are able to prove that the actually incurred damage is higher or if the customer is able to prove that the actually incurred damage is lower or that no damage incurred at all.

8.0 RETENTION OF TITLE, UTILISATION AND RELEASE OF SECURITIES

8.1 The purchased items shall remain our property until full payment of the purchase price including statutory VAT. Such retention of title shall remain in force until all our receivables based on the purchase contract are paid in full. Such retention of title shall also include all our other receivables based on the business relationship with the customer. For current accounts, the goods subject to retention of title shall be deemed security for our receivables.

8.2 If the purchased items subject to retention of title are processed together or mixed with other items that are the customer's sole property and if our title to the goods subject to retention of title ceases to exist in accordance with sections 947 and 948 of the German Civil Code, the parties agree that any new title to such newly created goods shall be deemed assigned to us as security for our outstanding receivables and that the customer shall keep such items in custody for us, free of charge and without right of return. If the purchased items subject to retention of title are processed together or mixed with other items that are subject to any third party's retention of title or that are property pledged as security to a third party and if our title to the goods subject to retention of title ceases to exist in accordance with
sections 947 and 948 of the German Civil Code, the parties agree that we shall become co-owners of such newly created item on a pro-rata basis in accordance with the ratio between the value of the goods subject to our retention of title and the value of the items that were subject to such third party's retention of title and/or pledged as security.

8.3 Should the customer - with our written consent - sell any purchased item subject to our retention of title, the customer shall assign to us all their receivables and ancillary rights resulting from such sale. This shall also apply to the pro-rata share of the value of our co-ownership if such purchased item is processed or mixed with other items.

8.4 The customer shall be entitled to sell any purchased item subject to our retention of title in the ordinary course of business; however, the customer shall assign to us immediately all their receivables and ancillary rights resulting from such sale. This shall also apply to the pro-rata share of the value of our co-ownership if such purchased item is processed or mixed with other items. However, the customer - in the ordinary course of business and until revoked - shall be entitled to collect such receivables which are assigned to us. Our entitlement to collect such receivables assigned to us shall remain unaffected thereby. We undertake to refrain from collecting any receivables assigned to us for as long as the customer is not in delay in payment for such receivables secured by such assignment of receivables and for as long as no application for the initiation of insolvency proceedings was filed against the customer's assets. In case of any delay in payment, we shall inform the customer in writing upon 2 weeks' prior notice of our intention to collect the receivables assigned to us. As soon as we are entitled to collect receivables assigned to us, the customer shall be obliged to deliver to us all documents and information, including but not limited to the names and full addresses of the debtors of such receivables assigned to us that are necessary in order to enforce such rights.

8.5 The customer shall be obliged to inform us immediately of any attachment by third parties of items that are our property in whole or in part and to inform such third party immediately of our right of retention. The customer shall be obliged to bear any costs for any action in opposition to the execution of a judgement, brought by a third party who claims title to the attached property and all other costs and expenses necessary in order to annul such attachment and to return our goods.

8.6 Upon request and at our discretion, we are obliged to release any securities to the extent the realisable value of all our securities permanently exceeds the total amount of all our receivables by more than 10%. When selecting the securities to be released, we shall take into consideration the customer's legitimate interests.

9.0 CUSTOMER'S DUTY TO INSPECT AND REQUIREMENT TO MAKE A COMPLAINT IN RESPECT OF A DEFECT IMMEDIATELY UPON RECEIPT OF THE PURCHASED ITEMS

9.1 Immediately upon receipt, the customer shall be obliged to inspect the purchased items and immediately inform us of any defects detected in writing. Should the customer fail to send such written notification of defect, the purchased items shall be deemed accepted except in case of defects that could not be detected during such inspection.

9.2 The customer shall be obliged to notify us of any defect detected at a later time immediately after detection and in writing; otherwise, the purchased item shall be deemed accepted irrespective of such defect.

9.3 A fax transmission shall be sufficient in order to comply with the written form provided for in section 9.1 and section 9.2 of these General Terms and Conditions; otherwise, a transmission by telecommunication means, in particular by email, shall not be sufficient.

10.0 DEFECT IN QUALITY

10.1 The customer's rights based on a defect in quality, irrespective of the legal basis, shall become statute-barred 12 month after delivery. This shall not apply in case of gross negligence or in cases of injury to life, limb or health. Section 10.1, clause 1 of these General Terms and Conditions shall neither apply to any defect we fraudulently concealed nor in case we guaranteed a certain quality of the purchased items nor to any claims subject to the Product Liability Act.

10.2 The customer's rights based on a defect in quality that existed already at the time the risk was transferred shall be limited, at our discretion, to subsequent performance in form of remedy of the defect or delivery of an item that is free from defects, unless we fraudulently concealed such defect in quality or guaranteed a certain quality of the purchased items. If we fail to perform the form of subsequent performance we selected (remedy of the defect or delivery of a purchased item that is free from defects), the customer shall be entitled, at their discretion, to reduce the purchase price or to rescind the contract.

10.3 We do not assume any liability for normal wear and tear, use under exceptional circumstances, wrong or negligent treatment or use of the purchased item for any other than the intended purpose.

11.0 LIABILITY

11.1 Our liability for any damage the customer suffers due to a defect in quality - except for any damage to the purchased item - shall be limited as follows
• to gross negligence;
• to injury to life, limb or health;
• to the typical damage foreseeable at the time the contract was concluded in case of any culpable violation of material contractual obligations if such violations endanger the fulfilment of the purpose of the contract;
• in cases in which we are liable in accordance with the Product Liability Act for personal injury and property damage of privately used items if caused by a defect of the purchased item;
• to cases in which expressly guaranteed qualities of the purchased item are lacking if such guarantee was made in order to protect the customer from damage incurring to any item other than the purchased item; and
• to cases in which we fraudulently concealed a defect or guaranteed a certain quality of the purchased item.
Otherwise, we shall assume no liability.

11.2 Section 11.1 of these General Terms and Conditions shall apply mutatis mutandis to any damage the customer suffers, except for any damage to the purchase object due to a defect other than a defect in quality.

11.3 Our exclusive liability for any damage the customer suffers due to a delay in delivery is described in Section 5.0 of these General Terms and Conditions.

11.4 Sections 11.1 and 11.2 of these General Terms and Conditions shall apply mutatis mutandis to any claims for damages asserted against our legal representatives and vicarious agents.

12.0 PLACE OF PERFORMANCE, PLACE OF JURISDICTION, APPLICABLE LAW AND SEVERABILITY

12.1 The place of performance for delivery of the purchase object shall be our (corporate) seat as entered in the trade register (hereinafter: Seat).

12.2 The place of jurisdiction for any claims from the respective contract for lawsuits with a value up to €5,000.00 shall be the district court locally relevant for our seat, and for lawsuits with a higher value the regional court locally relevant for our seat. However, we shall be entitled to file an action against the customer at their general place of jurisdiction.

12.3 The law of the Federal Republic of Germany shall apply exclusively, the UN Sales Convention (CISg) shall be excluded.

12.4 Should a provision of these General Terms and Conditions be or become ineffective, this shall not affect the legal effectiveness of the remaining provisions thereof. Such ineffective provision shall be deemed to be replaced by a legally admissible provision which comes as close as possible to the economic intent of such ineffective provision.
